Commencing the Installation

The installer will require Power User rights as a minimum, if you do not have sufficient rights request someone with Power User or Administrator rights to install the software for you.

Browse to the location containing the install file ('Package Name'.msi for example RTIPro.msi, RTILite.msi, RTIPayroll.msi or RTIPayrollLite.msi) highlight the file and press the 'Enter' key to run the install package.

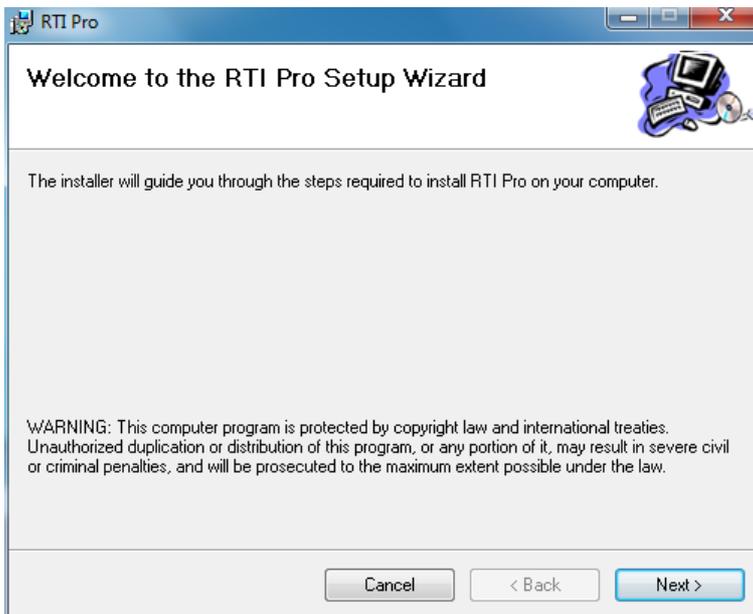

If the following screen is displayed, the Microsoft .NET Framework needs to be installed before the RTI software can be installed. The Microsoft .NET Framework can be downloaded using the following link: <http://www.microsoft.com/en-gb/download/details.aspx?id=25150> the version being Microsoft .NET Framework 3.5 Service pack 1.

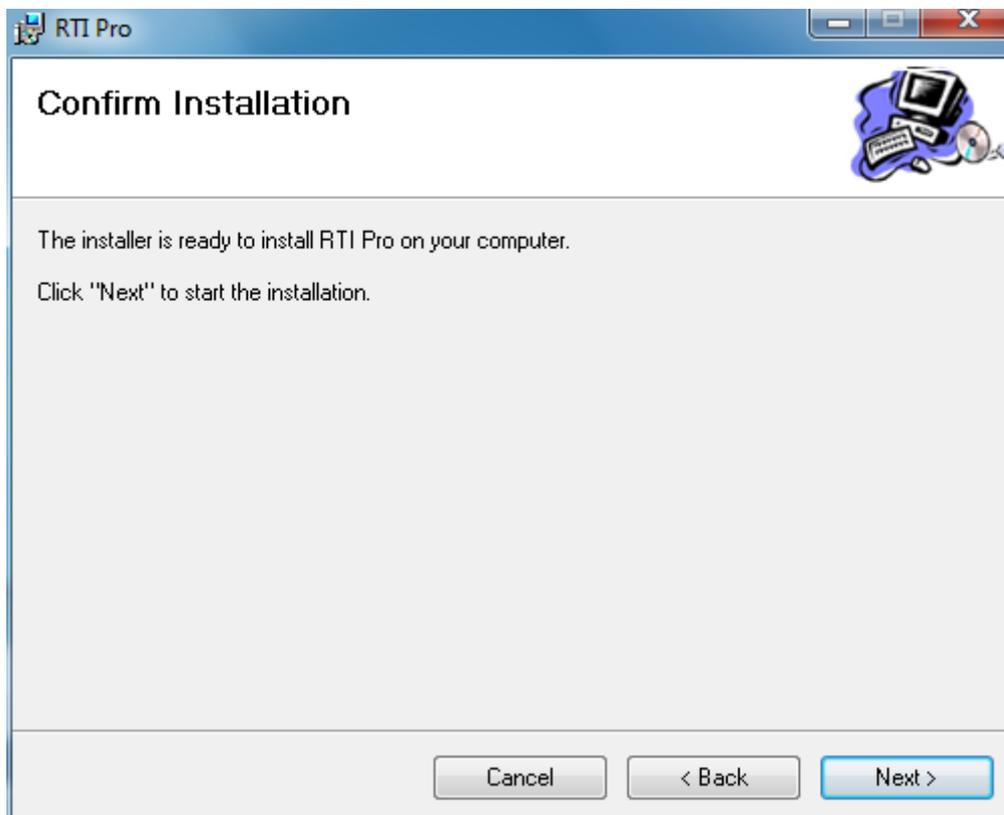

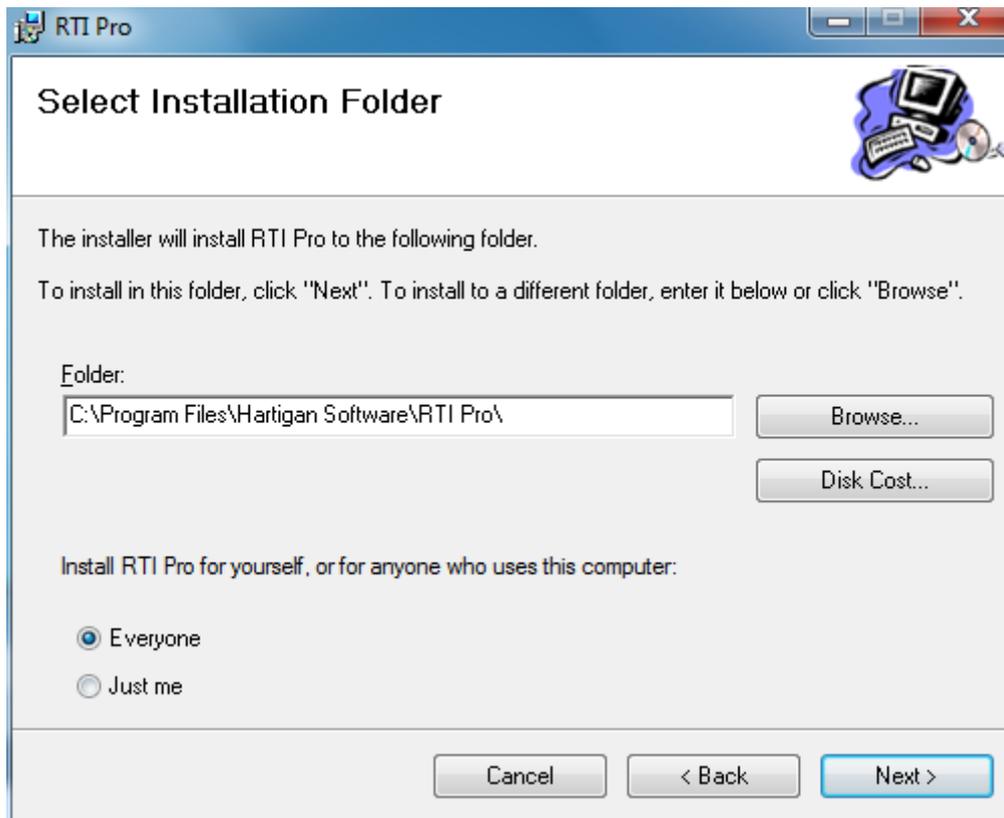

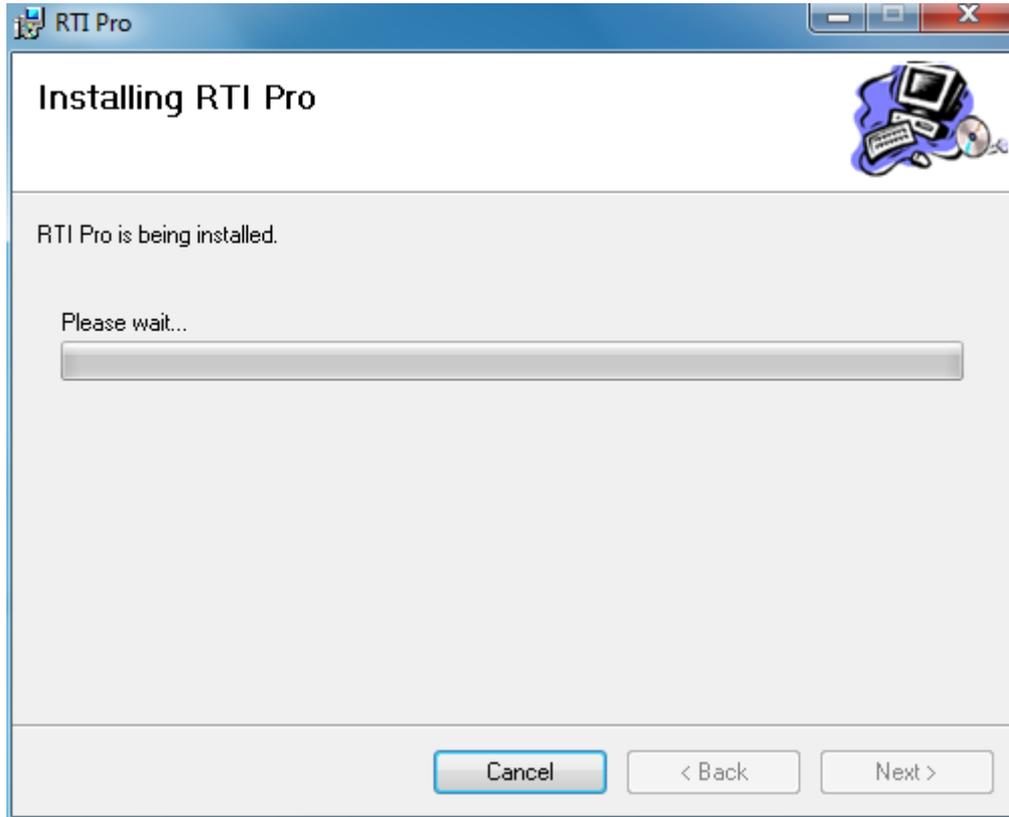

The following screens will be displayed during the installation. You will also be offered the option of changing the software installation location if required (the application should be installed locally, not on a network drive).

Note the content of the screen below then click 'Next' to begin the install.

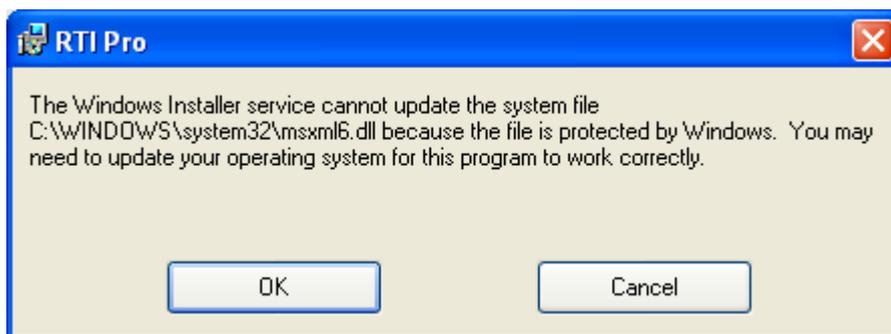

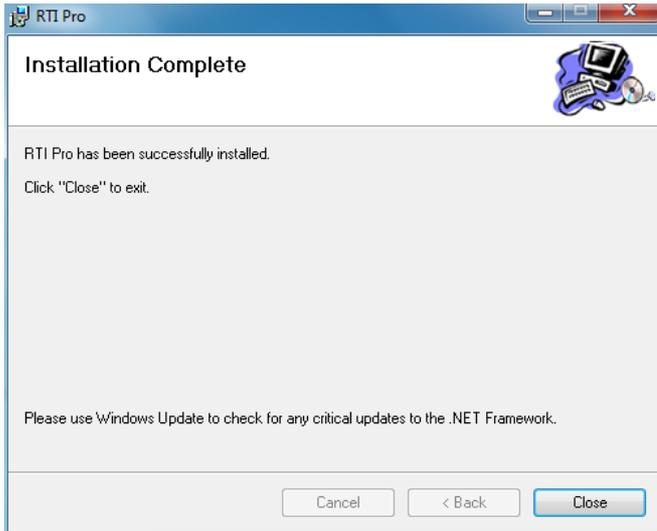

The software should be installed on a local (not network) drive.

If the following message appears click 'OK' to continue, the required file is already installed on the PC.

This install process will create the following shortcut on the PC desktop

Highlight the shortcut and press 'Enter' to start the application.

Licensing the application

Running the application for the first time will display the licensing screen:
